Ishan Rai

QA Engineer · Product Owner

Lalitpur, Nepal • raiishan67@gmail.com • +977 9865044105 • github.com/77ishan

PROFILE

QA Engineer and Product Owner with 3+ years of experience across product-based and service-based companies. I specialise in manual testing, test automation with Cypress, API testing with Postman, and performance testing with JMeter. I have built QA processes from the ground up, defined bug tracking workflows, and embedded quality early in agile development lifecycles, with a proven track record of reducing production defects. As Product Owner, I also own the backlog, user stories and priorities.

EXPERIENCE

QA & Product Owner CURRENT

Jun 2026 to Present

Rara Labs

- Combining QA and Product Owner responsibilities on the core product.
- Owning the product backlog: writing user stories and acceptance criteria, and prioritising with stakeholders.
- Leading sprint planning and backlog refinement, and signing off releases against acceptance criteria.
- Designing test strategy, test plans and detailed test cases.
- Running functional, regression and smoke testing cycles.
- Logging, tracking and verifying defects through to closure.

QA Engineer

Mar 2025 to Oct 2025

Progressive Labs, Kalopul, Kathmandu

- Pioneered and built the entire QA process from the ground up.
- Designed test suites covering functional, regression, smoke and UI testing.
- Defined and standardised bug-tracking workflows with severity and priority levels.
- Set up performance and load testing with JMeter.
- Established release-readiness checklists and sign-off procedures.
- Integrated QA early into the agile development lifecycle.

Associate QA Officer

Mar 2024 to Mar 2025

Khalti Digital Wallet, Lalitpur

- Performed smoke testing on every mobile build of the Khalti App.
- Developed and executed automated test cases in Cypress for the Khalti web application.
- Conducted API testing across services using Postman.
- Ran performance testing on the Khalti mobile app with JMeter.
- Collaborated in a Scrum team, tracking tasks in Jira.

QA Engineer

Apr 2023 to Feb 2024

Keela (Forty-two Tech), Lalitpur

- Executed system, regression and smoke testing across modules.
- Wrote automated test cases with Cypress for multiple product areas.
- Performed end-to-end testing of the software.
- Authored detailed test cases for Keela's modules.
- Tracked and managed reported bugs in Linear.
